

Are you compliant with the latest **ENERGY REGULATIONS?**

A DISPLAY ENERGY CERTIFICATE (DEC) IS CURRENTLY REQUIRED ANNUALLY FOR ALL SCHOOLS, COLLEGES, UNIVERSITIES & PUBLIC BUILDINGS OVER 1000m²

A DEC records the energy efficiency of a public building based on metered energy consumption as used annually over periods of up to the last three years (the Operational Rating).

The purpose of introducing DEC's is to raise public awareness of energy consumption by informing visitors to public buildings about energy use. DEC's provide an energy rating of the building from A to G, where A is very efficient and G is the least efficient. Once obtained, a DEC must be displayed on the building in a prominent place clearly visible to the public and should be no smaller than A3 in size.

KEY BENEFITS

- Shows energy performance of a building based on metered energy consumption
- Renewed annually to keep track of a building's energy costs
- Annual renewal indicates if the energy performance of a building is improving
- Provides a report of key recommendations that can reduce the energy use of the building and costs
- Improved public relations: environmental performance is increasingly important to reputation

PENALTIES FOR NON-COMPLIANCE

The penalty is £500 for failing to display a DEC at all times in a prominent place clearly visible to the public, and £1,000 for failing to have possession of a valid certificate and advisory report. In addition to these penalties a DEC would still need to be commissioned otherwise further offences will be committed.

A CSR DEC ASSESSMENT COVERS THE FOLLOWING:

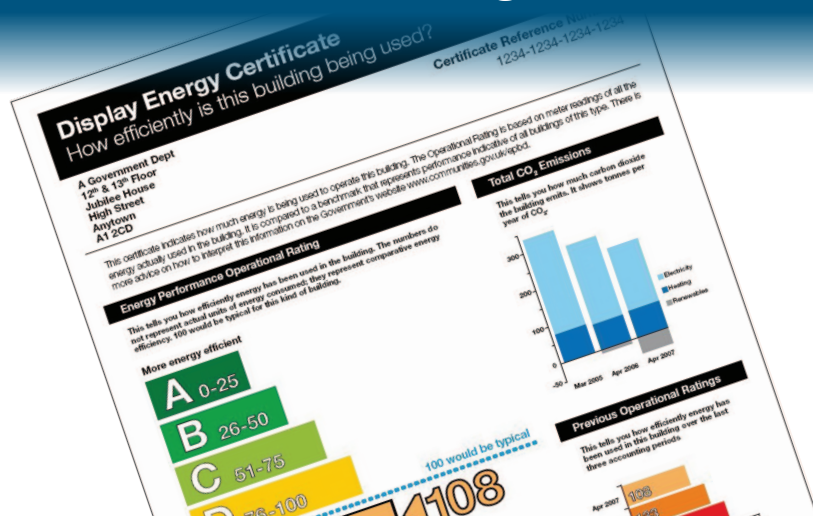

- Building Fabric
- Lighting
- Water Heating
- Boilers
- Chillers
- I.T.
- Water Temperature
- Heating, Ventilations & Cooling

A draft report is produced following the assessment that can be discussed with the client if required.

The final certificate is then issued and lodged at the Landmark Registry, while you receive your display copy.

We will then go through the recommendations to reduce energy costs and how to implement them.

We are a trustworthy company that offers a service at the lowest cost, guaranteed*

*we will happily beat any like for like quotation based on proof of quotation from another accredited company

WHO WE ARE

CSR Sustain have been a leading provider of energy saving advice and compliance certification from 2008 and have a broad degree of experience – in fact we are one of only a small number of companies who have government accreditations covering all 6 of the Government Accreditations to issue compliance energy assessments for all types and levels of buildings.

Our other services include:

- Residential & Commercial Energy Performance Certificates for construction, sales or lettings
- Display Energy Certificates (Public Buildings)
- Energy Audits of Existing Buildings
- CO₂ Emission Targeting & Forecasting
- Low & Zero Carbon Technology Studies
- Part L compliance SBEM & SAP Calculations
- Strategic portfolio energy efficiency advice
- Design & Management of Estate wide Energy Efficiency Controls
